STAR WAX

BEESWAX POLISH

For polished stone, marble, granite, limestone and concrete

PRODUCT FEATURES

- Made from a special organic beeswax designed for the beautification of polished stone.
- Enhances the shine and increases the depth of color on polished stone countertops and table surfaces.
- Restores luster while helping to hide etching and abrasions.
- Leaves no oily residue and does not smudge.
- Maintains a hard, polished surface for a minimum of 12 months — typically 12 to 24 months with normal household use.
- Very easy to apply. No special skills required — anyone can use it as everyday stone care.
- Recommended by INTERTOOL as regular maintenance for polished stone surfaces.

PRODUCT DESCRIPTION

Star Wax Beeswax Polish contains pure beeswax formulated to spread easily. This polish is used for the beautification and protection of polished marble, limestone, onyx, granite, travertine, serpentine, terrazzo, concrete and other fine stone. Ideal for counters, walls, vanities and tables.

PREPARATION

Stone or concrete should be dry and clean before application. Remove dust, soap film and any previous oily residue.

APPLICATION

Apply Star Wax Beeswax Polish to smooth stone or concrete in a thin film. Allow to dry for 2 minutes and buff to obtain shine and polish. A little goes a long way — apply sparingly.

STONE CARE · WE RECOMMEND

Use Star Wax Beeswax Polish as simple, regular care for polished stone. One thin application helps keep the hard surface looking rich in color for 12–24 months. Easy enough for anyone at home — no contractor required.
